

BSc Accounting with/without Industrial/Professional Experience

First Year – 2017/18

Recommended Reading List

This reading list is designed to give you an insight into the reading material you can expect to cover during your first year courses.

Some costs may be incurred for books but, where possible, texts will be made available in the library (which we would encourage all students to use) or via digital formats. There may be an opportunity to purchase second hand books but please also bear in mind that sometimes the suggested reading may change.

Course Code	Credits	Course title	Suggested reading
